Canadian Transportation Agency  
15 Eddy Street  
Gatineau, Quebec  
J8X 4B3

**RE: Certificate of Insurance covering Railway Third Party Liability for passenger operations**

On February 23, 2016 Aon was appointed the Broker of Record and consultant by Moose Consortium Inc. As the world's leading dedicated rail practice Aon is in a position to make valuable recommendations in matters of insurance and risk management.

Aon has put together an insurance package (liability, office contents and equipment) to suit the current needs of Moose Consortium Inc. which is a corporate office. Certain conditions described by the Canadian Transportation Agency can be met, however they do not apply as yet, e.g. financial strength rating, the built in re-instatement feature, and prior written notification of cancellation.

Once tangible operations would begin Aon will be ready to secure the appropriate requirements and limits of liability meeting all of the Canadian Transport Agency mandates through Aon partnered insurance carriers. As the project evolves Aon will be making recommendations throughout the projects phases of design, procurement and build, including sourcing of infrastructure to the actual management of the finished rail line.

If you require further information, please contact our office.

Sincerely  
AON REED STENHOUSE INC.
